

# KX1814-S2

Double Head CCD Laser Cutter

Laser cutting technology is ideal enough to smoothly and effectively cut many kinds of materials without causing it any harm overall.

The KX1814–S2 CCD Laser Cutter is the Co2 laser cutter combined with the smart CCD vision software and camera. It can detect features of small–sized printed or embroidered fabrics, leather, and other flexible materials and then position cut with high accuracy.

Vision: 1800MM\*1400MM

Machine Size: 2420\*2230\*1120MM

Under the non-vision cutting mode, the two heads of the KASU KX1814-S2 laser cutter can simultaneously cut the same shapes of patterns in plain fabrics. And when working under the vision mode, this model can also position cut graphics at a very high speed.

#### APPLICATIONS

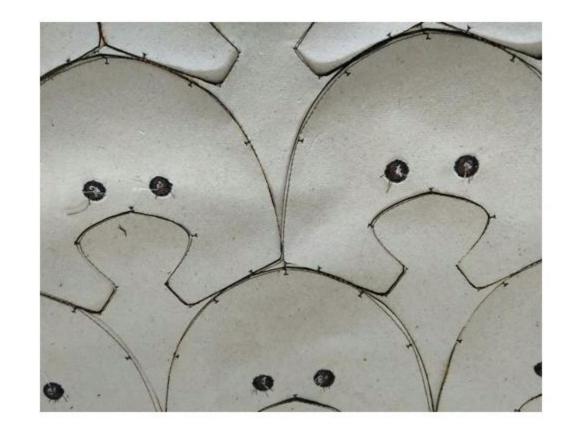

Dye Sublimated Applique

Embroidery Applique

Hot Stamping Sticker

Plush Toy Patches

Printing Leather

Screen Print Label

RFID Tag

Woven Label

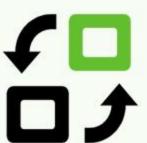

#### KEY FEATURES

Bigger Cutting Area,
Same Cutting Precision

Doubled Cutting Efficiency,
Higher Productivity

Both Vison and Non-Vision Working Modes

Stable and 24 Hours Running

Super Simple to Operate

#### Smart CCD Vision and Control Software

With the help of the industrial CCD camera and the vision software, the KX1814–S2 camera laser cutter can automate the whole graphic detection and position–cutting process. KX1814–S2 can finish a very high precision cutting especially when cutting small–sized printed or embroidered patches under 15cm. Compared with the KD1814–S2 with a top Canon camera, KX1814–S2 is cheaper and a very good option for start–ups.

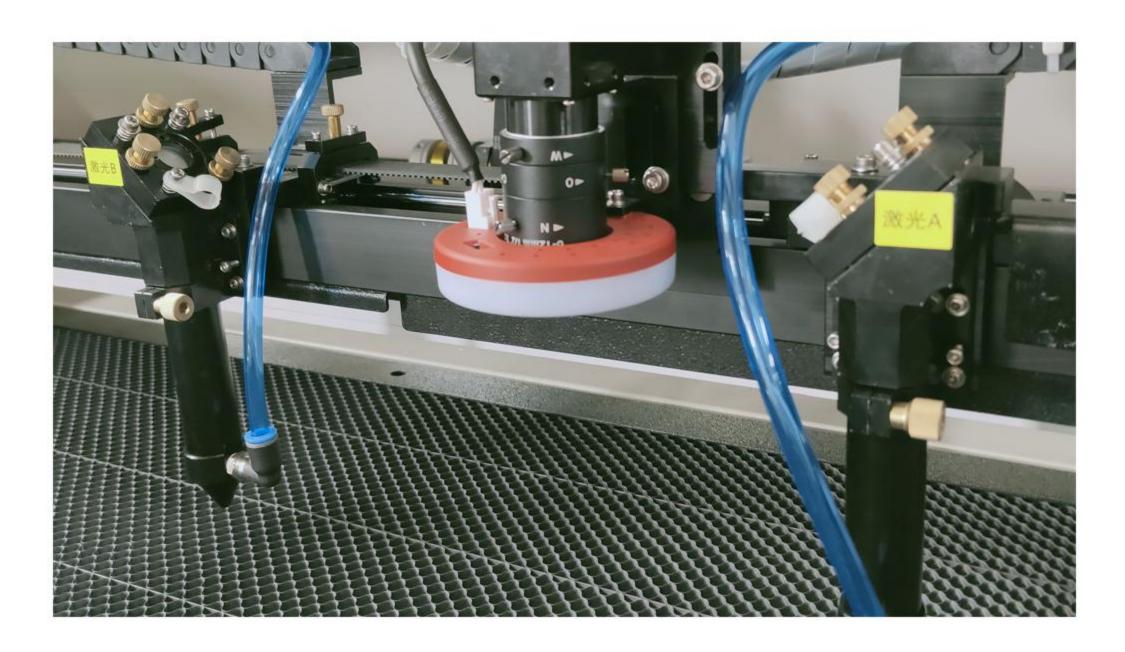

# Auto Feeding Conveyor Table

KX1814-S2 is equipped with a chain conveyor belt, which can auto-feed the roll material right after the laser cutting process. With the optional active feeder, the operator only needs to take care of the cut pattern pick-up job.

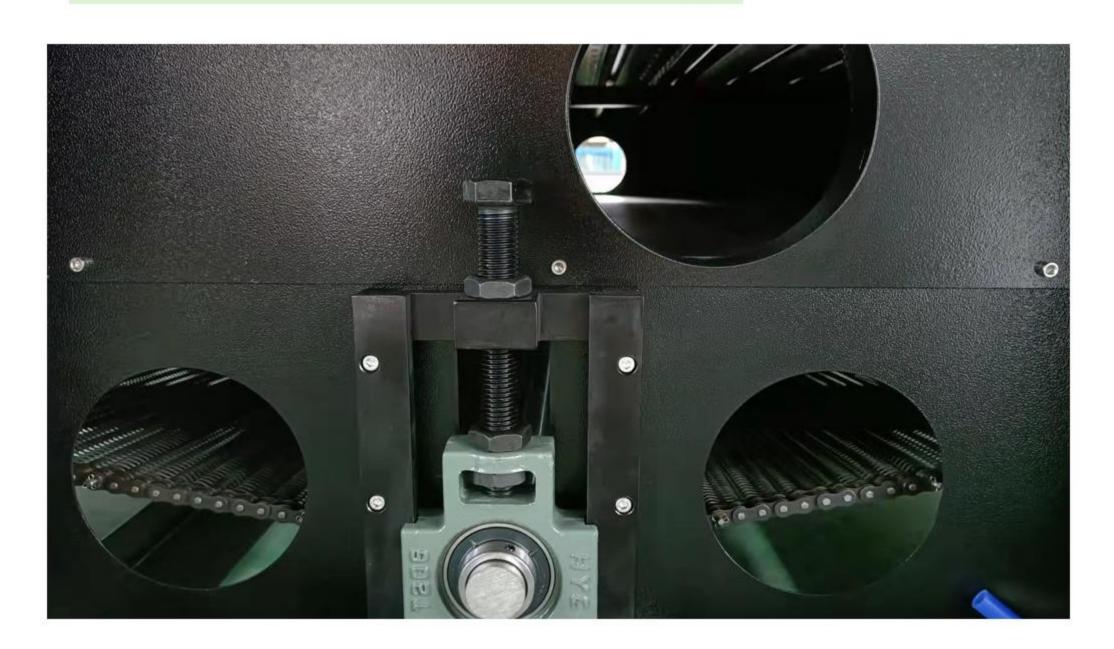

### Dual Cutting Heads

KASU KX1814–S2 laser cutter is equipped with two cutting heads. Under the non-vision cutting mode, the two heads of the KASU KX1814–S2 laser cutter can simultaneously cut the same shapes of patterns in plain fabrics and double the production compared with single head laser cutter.

### Three–Axis Structure Design

The triangle structure is more stable and more convenient to adjust the conveyor belt. Reasonable cavity design enhances the effect of fume exhausting. And it offers bigger room than two-axis structure and reduce the risk of potential fires. Also bigger room makes the dust exhausting job much easier for you.

#### TOP QUALITY SPARE PARTS

Control Card

**Cutting Head** 

Glass Tube

Laser Power

AC Water Chiller

Exhausting Fan

Air Pump

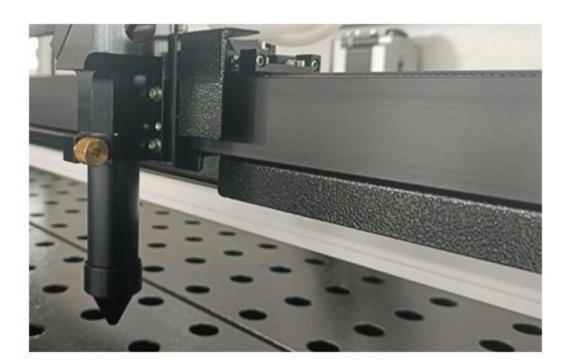

Lense

Stainless Steel Screw

Motion Module

Guide Rail

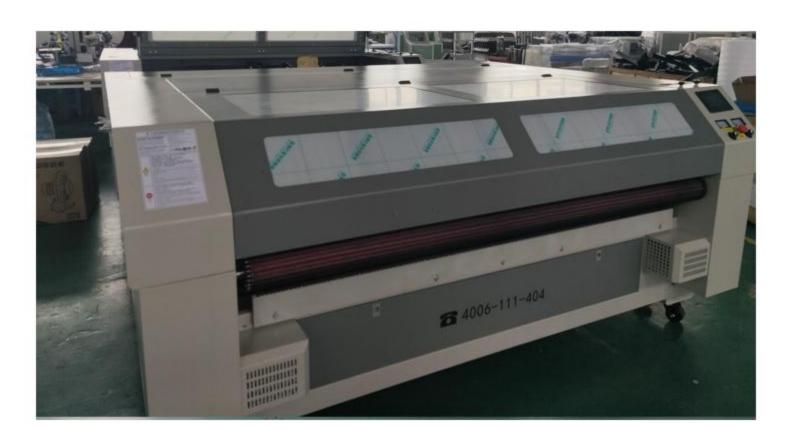

Spare Parts Tool Kit

To keep your laser cutter running for years, we provide you high quality spare parts verified by our QC process. And we offer replacing spare parts to our clients at COST PRICE just to ensure you have the best using experience and lowest maintenance cost.

## SAFETY DESIGN

Following the safety standards, we try everything to make a reliable machine to protect both your operator and your laser machine.

All-Round Safe Cover

Alarm Lamp

Emergency Button

Switch Built-in Design

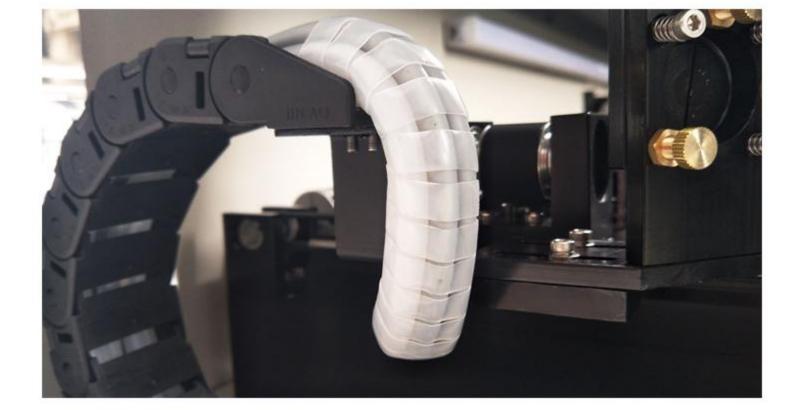

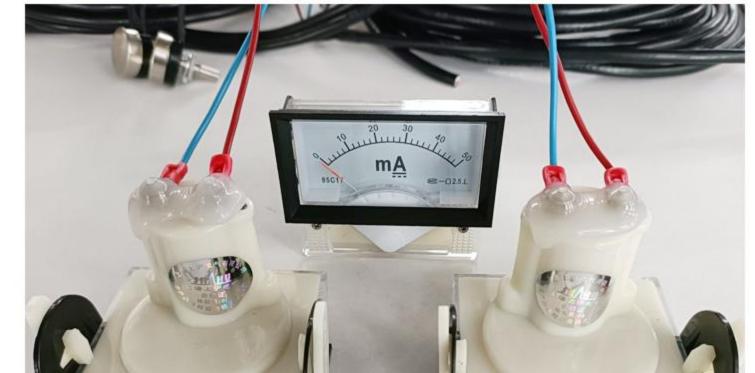

High-Voltage Wire Insulation

Insulation Support Frame

# AUTO ACTIVE FEEDER

Machine Size: 2210mm\*530mm\*920mm

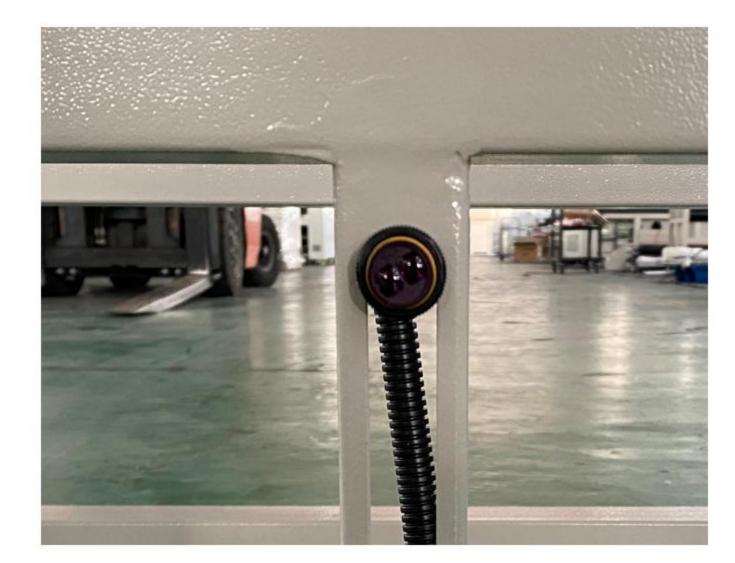

KASU's automatic active feeder is specially designed for auto-feeding roll-to-roll fabric or other soft materials. Reasonable structural design can be adapt to a variety of fabrics.

It is equipped with high sensitivity sensor switch to sense the presence or absence of the materials and then decide to start feeding or stop. It has an independent control system and can be connected to any brand of the laser machine. Branded motion system and other quality electric spare parts can ensure 24 hours stable running.

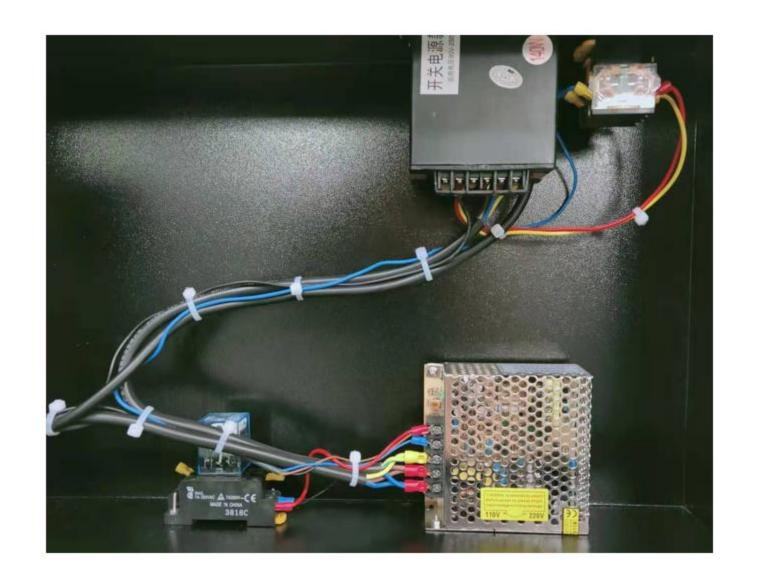

#### KEY FEATURES

High Temperature Hardened Steel Frame Structure

High Sensitivity Sensor Switch

Independent Control Board

Width Adjustable Fabric Stopper

Well Designed Fabric Roller With Friction

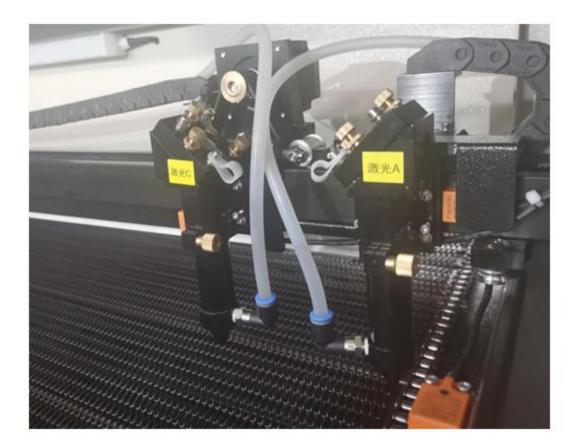

Strong Universal Wheels & Machine Feet

# OPTIONAL DEVICES

Non Camera

Active Feeder

Extended Pick-up Table

# MACHINE PARAMETERS

| Working Area                 | 1800MM*1400MM                  | Software                  | KASU                         |
